FOR IMMEDIATE RELEASE

DTANK FURNITURE LAUNCHES COART ACOUSTICS AT NEOCON 2018

CoArt Acoustics presents line of acoustical configurations and new art collections for branded commercial interiors.

LOS ANGELES, CA. APRIL 4, 2018.

dTank will be presenting CoArt Acoustics, a complete acoustical art system that combines an effective acoustic solution with custom and ready-made art collections at The Mart in Chicago on June 11-13th. NeoCon serves as the commercial design industry's launch pad for innovation- showcasing ideas and products that shape the built environment today and into the future. CoArt Acoustics is a framed acoustical panel wrapped with a printed fabric that serves a variety of purposes but most notably solves acoustical issues while branding a space with ready-made or custom art. Key features include double-sided and interchangeable art fabric, dry-cleanable fabric up to 100 feet long, and turnkey installation.

CoArt offers interiors seven different acoustical configurations from being mounted against a wall, hung from the ceiling, to a moveable freestanding option. The sleek, high-end frame and innovative suspension technology can also be used to divide a space, create privacy or be used as a design element. The system received a 0.8 NRC acoustic rating and Class A fire rating. From acoustic effectiveness and corporate branding to providing inspiring and welcoming spaces, those working in healthcare, educational, corporate or commercial environments will find CoArt Acoustics the solution to enhancing the performance of their space. CoArt will also be launching its latest ready-made Art Collections curated with an array of tones, hues, and color ways. With the option of custom branded art, the final product provides the exact look, feel, and functionality for any space.

"After nearly two decades of working with architects, designers, and end users, we began to see a need for functional, branded acoustical art to correct and prevent architectural sound problems. We created CoArt as a multifunctional system that enables a collaborative and turnkey experience for our clients. By implementing this process we create an adaptive, high-quality product with meaningful art that tells a story," explains Principal, Reto Eberle. "We see NEOCON as the ultimate platform for launching a product like CoArt, giving us the opportunity to get our product directly in front of the design community."

dTank's experience in the industry and ability to adapt to customer needs allow them to continually innovate and develop relevant solutions. All products are manufactured in the United States, using the most advanced materials and fabrication techniques. Interior designers, architects, and end users alike seeking to treat inconvenient acoustic reverberations can visit us on the 7th floor at booth #2004 or call us at (818) 252-3888. We are also available via email at info@coartbydtank.com. For more information on dTank's custom services as well as CoArt acoustical products, visit our website here.

###

ABOUT COART ACOUSTICS

Driven by art, functionality, and interior design, CoArt combines acoustics with art, to make acoustics beautiful and art functional. No project small or large deters the creative and innovative ambition of CoArt, providing acoustical solutions across various industries, with an understanding of each environment and their acoustic requirements. CoArt provides full turnkey, concept to installation, service to every client.

ABOUT DTANK
