

# DIVIDER PANEL SPECIFICATIONS

...

## DESCRIPTION

The Divider Panel system is an aluminum and is freestanding using aluminum divider feet. This system allows you to move the panel within a space. The frame has an acoustical core center and is wrapped with an acoustically transparent printed fabric that is inserted into the frame using an SEG technology. The fabric can be dry-cleaned or easily interchanged. Freestanding panels will have fabric on both the front and back. The frame comes in aluminum silver, black or white color options and the entire panel is Class A Fire rated and 0.8 NRC Acoustic rated.

## FEATURES

- Panels can be moved throughout space
- Creates a divide or provides privacy
