

FLOATING SUSPENSION PANEL SPECIFICATIONS

...

DESCRIPTION

The Floating Suspension system has an aluminum frame and is suspended from the ceiling and mounted to the floor using aluminum suspension technology. Our reliable suspension system allows you to easily adjust the height of your acoustic panel when floating within a space. The frame has an acoustical core center and is wrapped with an acoustically transparent printed fabric that is inserted into the frame using an SEG technology. The fabric can be dry-cleaned or easily interchanged. Floating panels will have fabric on both the front and back. The frame comes in aluminum silver, black or white color options and the entire panel is Class A Fire rated and 0.8 NRC Acoustic rated.
